**System Type: Enolmaster**

**Model: Bench mounted 4 head inline low vac filling machine**

**Year: 2024/25**

STANDARD MACHINE SPECIFICATIONS (All details are for guidance only, and subject to confirmation)

Direction: N/A

Capacity: 600 Bottles Per Hour

Mains Power req: 230V 50Hz 120W

Compressed air req: None

Weight: 25 Kg

Dimensions: 650 x 460 x 450h mm

The product is bottled naturally through vacuum-operated filling, ensuring its quality preservation. During the bottling process, the vacuum draws the fluid into the bottle, eliminating direct contact with the pumps or components.

The Enolmaster possesses the capability to fill up to 600 Bph of water under ideal hygienic conditions and without any product spillage. The filling level is adjustable, and once selected, it automatically fills the bottle to the desired capacity. The user interface is intuitive and user-friendly, making it particularly advantageous for bottling oils. Additionally, it eliminates the need for header tanks as it can draw product directly from the floor level.

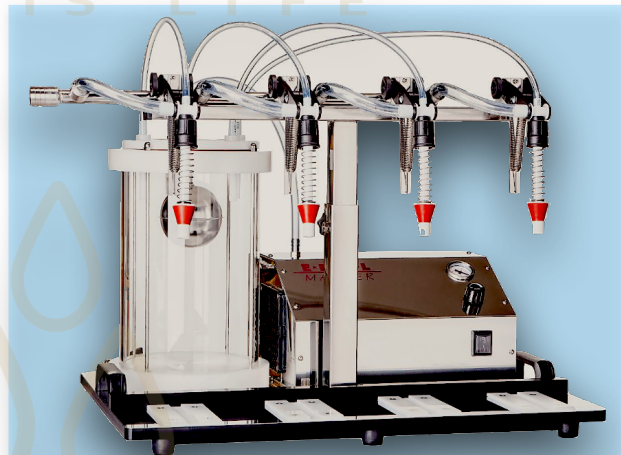

Key Features:

- All Stainless Steel Construction S316
- Semi-Automatic Operation
- Fully Adjustable Fill Heights
- Easy Cleaning
- Bottle Platforms
- Maximum Bottle Height: 350mm

Options:

interchangeable twin nozzle miniature kit

Pyrex vacuum vessel
